

AMENDMENTS TO THE CLAIMS

Please amend claims 1, 6 and 11. This listing of claims will replace all prior versions and listings of the claims in this application.

CLAIMS

What is claimed is:

1 1. (Currently Amended) A robot system, comprising:
2 a robot that has a camera and a monitor, ~~said first remote station having a first priority;~~
3 a first remote station that has a monitor and can access and control said robot, said first
4 remote station having a first priority;
5 a second remote station that has a monitor and can access and control said robot
6 independently of said first remote station, said second remote station having a second priority
7 higher than said first priority; and,
8 an arbitrator that can control access and control of said robot by said first and second
9 remote stations, said arbitrator provides access and control of said robot to said second remote
10 station and sends a callback message to said first remote station when said second remote station
11 no longer has access and control of said robot.

1 2. (Canceled)

1 3. (Previously Presented) The system of claim 1, further comprising a broadband
2 network coupled to said robot and said first and second remote stations

1 Claims 4&5 (Canceled)

1 6. (Currently Amended) The system of claim 1, wherein ~~said second remote station~~
2 ~~can access said robot, and said first and second remote stations each have a priority and said~~
3 arbitrator provides robot access to said remote station with a highest priority.

1 7. (Previously Presented) The system of claim 6, wherein said first and second
2 remote stations may be given priority as a local user, a doctor, a caregiver, a family member, or a
3 service user.

1 8. (Previously Presented) The system of claim 1, wherein said robot operates in
2 either an exclusive mode or a sharing mode.

1 9. (Previously Presented) The system of claim 1, wherein said first remote station
2 transmits a communication for said robot that is initially transmitted to said second remote
3 station.

1 10. (Previously Presented) The system of claim 1, wherein said first remote station
2 sends a communication for said robot that is initially transmitted to said robot.

1 11. (Currently Amended) A robot system, comprising:
2 a robot that has a camera and a monitor;
3 a first remote station that has a monitor and can access and control said robot, said first
4 remote station having a first priority; and,
5 a second remote station that has a monitor and can access and control said robot
6 independently of said first remote station, said second remote station having a second priority
7 higher than said first priority; and,

8 arbitration means for controlling access and control of said robot to by said first and
9 second remote station[s] and sending a call back message to said first remote station when
10 displaying a message that is displayed by said second control station monitor no longer has
11 access and control of said robot.

1 12. (Canceled)

1 13. (Previously Presented) The system of claim 11, further comprising a broadband
2 network coupled to said robot and said first and second remote stations.

1 Claims 14-16 (Canceled)

1 17. (Previously Presented) The system of claim 16, wherein said remote stations may
2 be given priority as a local user, a doctor, a caregiver, a family member, or a service user.

1 18. (Previously Presented) The system of claim 11, wherein said robot operates in
2 either an exclusive mode or a sharing mode.

1 19. (Previously Presented) The system of claim 11, wherein said first remote station
2 transmits a communication for said robot that is initially transmitted to said second remote
3 station.

1 20. (Previously Presented) The system of claim 11, wherein said first remote station
2 sends a communication for said robot that is initially transmitted to said robot.

1 21. (Previously Presented) A method for controlling access to a remote controlled
2 robot, comprising:
3 transmitting a request to access and control a robot from a first remote station with a first
4 priority;
5 transmitting a request to access and control the robot from a second remote station that
6 has a second priority higher than the first priority
7 allowing access and control of the robot to the second remote station;
8 transmitting video images between the robot and the first remote station;
9 relinquishing access and control of the robot by the second remote station; and,
10 transmitting a callback message to the first remote station.

1 Claims 22-26 (Canceled).

1 27. (Previously Presented) The method of claim 26, wherein the remote stations
2 may be given priority as a local user, a doctor, a caregiver, a family member, or a service user.

1 28. (Previously Presented) The method of claim 25, wherein the robot operates in
2 either an exclusive mode or a sharing mode.

1 Claims 29-60 (Canceled)

1 61. (Previously Presented) The method of claim 1, wherein the robot is mobile.

1 62. (Previously Presented) The system of claim 11, wherein said robot is mobile.

1 63. (Previously Presented) The system of claim 21, wherein said robot is mobile.

1 Claims 64-66 (Canceled)
